KODAK **PRINERGY Cloud**
FILE ARCHIVE AND BACKUP

PROTECT YOUR BUSINESS CRITICAL ASSETS WHILE BENEFITING FROM IMPROVED OPERATIONAL EFFICIENCY

In today's increasingly digital world, customer files have become the life-blood of your business. Archiving and accessing files efficiently, without worry of data loss or security, allows your company to focus on what you do best—completing jobs on time and on budget.

PRINERGY Cloud's File Archive and Backup service provides superior levels of security while it automates archiving for higher levels of efficiency. This service goes beyond off -site storage as it delivers better protection for your business's critical assets while reducing infrastructure cost and increasing operational productivity.

In addition, it is ANALYTICS ENABLED. Providing you a robust business intelligence solution to harness your data into actionable fact-based decisions.

Benefits
- Dramatically reduce risk of data loss
- Reduce infrastructure cost to store and manage files
- Increase operational efficiency
- Automated intelligent archiving with redundant data back-up "built in"
- Scalable data storage options
- ANALYTICS ENABLED with Decision Analytics
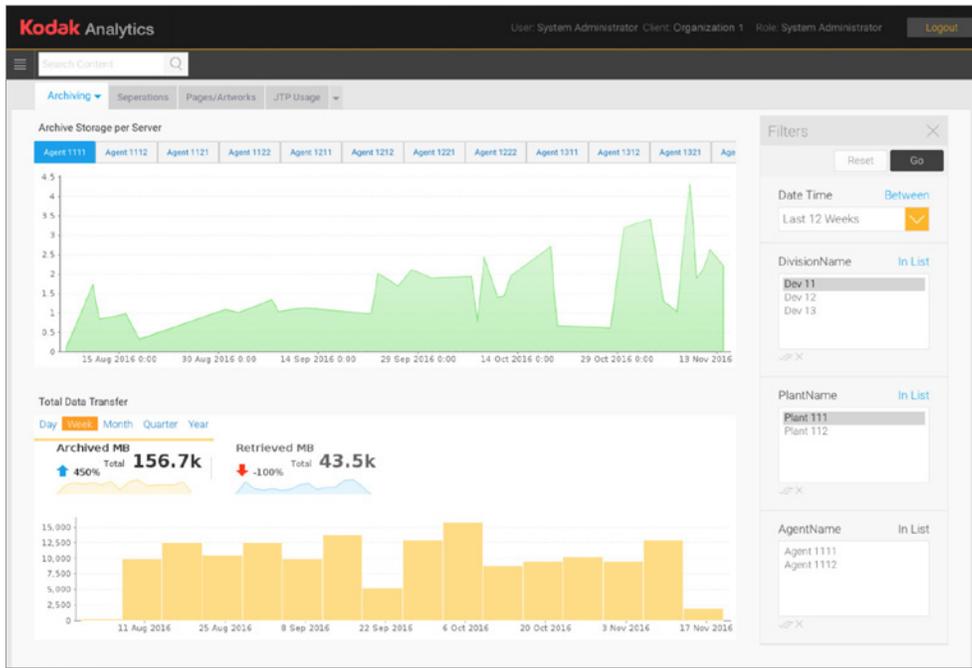

PRINERGY CLOUD IS FAST, RELIABLE AND SECURE

- Hosted on Microsoft Azure platform ensures peak performance
  - Multiple data centers world-wide means fast performance
  - Data centers can horizontally scale to meet peaks in demand
  - Data is encrypted and backed-up on multiple servers

- 24/7 continuous monitoring means high availability and security

● Customer Engagement Center   ● Operations Center   ● Data Center

GROW YOUR BUSINESS BY UNLOCKING YOUR COMPANY'S VALUABLE DATA

File Archive and Backup Dashboard tracks:

- Archive Storage per Server
  - Automated email notifications when storage usage reaches your subscribed tier limit

- Files Archived, Retrieved, Deleted
  - Monitor archive and retrieve activity

- Amount of data copied to/from Cloud storage
  - Monitor the amount of data uploaded and downloaded

A closer look

Benefit	Feature	Description
Reduce infrastructure cost	Off-site Storage & Backup	• Eliminate expensive hardware • Reduce administrative and overhead costs
Dramatically reduce risk of data loss	Hosted on MICROSOFT AZURE platform and Monitored by PRINERGY Cloud Operation Centers	• Data is encrypted and monitored for high security • Hosting by MICROSOFT AZURE provides built-in redundancy – Stored across 3 different storage devices in the primary center – Back-up data centers within 500 KM – 6 copies of each job are archived
